MEMORANDUM FOR: [REDACTED]

STATINTL

As you know, I told Jim Garrison that I would approve his new table of organization at a maximum of [REDACTED] lions with the understanding that his ceiling would remain [REDACTED]. I have not had an opportunity to dig into this matter ~~deep enough~~ to know for sure whether his concept is entirely correct. Generally, however, I think it is OK. Specifically, I have not settled any of the controversial matters as to whether he should have traffic control, cargo control, and transportation which is now a part of Administrative Service. As soon as you get through your orientation in procurement and supply, I wish you would give this organization your immediate attention and supply me with your recommendations. In addition to examining the over-all concept, pay particular attention to those controversial items which Garrison proposes to transfer from other shops to his.

STATINTL
